SMSEAGLE MHD-8100-4G

Tech datasheet

DEVICE DESCRIPTION

SMSEagle is a professional **hardware SMS gateway** for sending and receiving SMS messages in an automated manner. The device is designed with focus on reliability and stability. SMSEagle has a modern responsive web-interface, stable database backend, and built-in 8x 4G modems with fail-over mechanisms (based on software watchdog) which monitor the work of a modem. Thanks to built-in 4G modems, SMS messages are sent/received directly to/from GSM/UMTS network without using any external 3rd party solutions. The device is equipped with antennas with 2dBi gain – important especially in poor signal reception conditions

(eg. Server rooms). SMSEagle has a built-in **SQL database** for secure storage of sent and received messages. Built-in SNMP agent allows to constantly monitor a performance of the SMSEagle. The device has a range of built-in plugins (**Email2SMS, SMS2Email, Network Monitoring, SMS Forward, Periodic SMS, Callback URL, Autoreply** and other) that enable additional functionalities. SMSEagle has easy to use API for integration with external applications.

Ready-to-use source codes for API are provided on www.smseagle.eu website.
